

PCM Service Update

Replacement of RT0085 Diagnostic Kit

#SUP2003-05

with Rinda Diacom P/N RT0086

June 2003

Part Number Affected: RT0085 PEG Diagnostic Software

PCM made available an inexpensive diagnostic kit for MEFI 4 systems earlier this year. This was an attempt at providing an inexpensive way to communicate with the MEFI 4 ECM. Since the release of this diagnostic kit, RT0085, some copyright issues have been raised. Because of these copyright issues, it has been decided that the RT0085 Diagnostic Kit will no longer be available.

A new software package will soon be offered in the place of the RT0085. The new software is Diacom, made by Rinda Technologies. The Diacom package offers many advantages over the RT0085. Some of the features include:

- Communicates across most PC platforms using either serial port, or the USB port (for laptops that do not have a serial port)
- Communicates with MEFI 1, MEFI 2, MEFI 3, MEFI 4 and MEFI 4B
- Capabilities of incorporating service manual information into the program
- Capable of performing "field" calibration downloads without replacing the ECM

CURRENT OWNERS OF THE RT0085 DIAGNOSTIC KIT

If you currently own a copy of the RT0085 Diagnostic Kit, you need to return it to PCM Warranty, attention Debra Southerland, and you will receive a Diacom Kit at no charge to you. We need to recover all components of the kit (cable, CD, instructions). Once the RT0085 Kit is returned and received in Warranty, a Diacom Kit, p/n RT0086, will be sent to you immediately. Do not hesitate on this offer, as there are many added benefits to using the Diacom software.

For those dealers who purchased the RT0085 at \$249.00 are getting an exceptional deal on the Rinda Diacom. The added features of Diacom still make it the best diagnostic tool.

FUTURE ORDERS FOR DIAGNOSTIC SOFTWARE

Any future orders for diagnostic software need to order Part Number RT0086, and you will receive the Diacom software at the retail price of \$579.00.
